Temporal SDKs

A code editor window with a dark theme. The title bar shows standard window controls (red, yellow, green buttons) and the filename "MoneyTransferWorkflow.java". The code is written in a monospaced font with syntax highlighting: keywords are orange, identifiers and literals are light blue, and strings are purple. The code defines a public void transfer method with four parameters: Account from, Account to, String refId, and Amount amount. The method body contains two calls to accounts.withdraw and accounts.deposit, both with the same arguments (from, amount, refId). The method is enclosed in curly braces.

```
public void transfer(Account from,  
                    Account to,  
                    String refId,  
                    Amount amount) {  
  
    accounts.withdraw(from, amount, refId);  
    accounts.deposit(to, amount, refId);  
  
}
```
