

Project History

Example: money transfers

A code editor window with a dark background and a title bar. The title bar contains three window control icons (red close, yellow minimize, green maximize) on the left and the text 'MoneyTransferWorkflow.java' in the center. The code is written in a light-colored font with syntax highlighting: keywords are orange, types are light blue, and method calls are purple. The code defines a public void method named 'transfer' that takes four parameters: 'Account from', 'Account to', 'String refId', and 'Amount amount'. The method body consists of two lines: 'accounts.withdraw(from, amount, refId);' and 'accounts.deposit(to, amount, refId);', followed by a closing curly brace. A vertical line is visible on the left side of the code area, likely representing a scrollbar or a selection boundary.

```
MoneyTransferWorkflow.java

public void transfer(Account from,
                    Account to,
                    String refId,
                    Amount amount) {

    accounts.withdraw(from, amount, refId);
    accounts.deposit(to, amount, refId);
}
```
